### COLOR

The wide range of beautiful colors and shades in which plumbing fixtures may now be had, offers to the home owner the opportunity for individual expression in the bathroom, as well as in the other rooms of the home.

Colored Fixtures give an added charm and should have your serious consideration when planning your bathroom. The extra cost for color is not great and the installation cost is no more than for white fixtures.

### A FULL LINE OF PLUMBING FIXTURES

The fixtures shown in this booklet are those more generally used in the home. A choice of several styles is offered in most items.

The complete ELJER line includes fixtures for schools, public buildings, hospitals, prisons and nearly every plumbing requirement.
